	Database Identifiers	GENEPIO:0001122							
Database Identifiers	specimen collector sample ID	GENEPIO:0001123	The user-defined name for the sample.	Store the collector sample ID. If this number is considered identifiable information, provide an alternative ID. Be sure to store the key that maps between the original and alternative IDs for traceability and follow up if necessary. Every collector sample ID from a single submitter must be unique. It can have any format, but we suggest that you make it concise, unique and consistent within your lab.	prov. mpox. 1234		1.0.0	1.0.0	1.0.0
Database identifiers	specimen collector sample ib	GENEFIO:0001123	The user-defined name for the sample.	Store the primary ID of the related specimen previously	prov_mpox_1234		1.0.0	1.0.0	1.0.0
Database Identifiers	Related specimen primary ID	GENEPIO:0001128	The primary ID of a related specimen previously submitted to the repository.	submitted to the National Microbiology Laboratory so that the samples can be linked and tracked through the system.	SR20-12345		1.0.0	1.0.0	1.0.0
				Provide the case identifer. The case ID greatly facilitates linkage between laboratory and epidemiological data. The					
Database Identifiers	case ID	GENEPIO:0100281	The identifier used to specify an epidemiologically detected case of disease.	case ID may be considered identifiable information. Consulthe data steward before sharing.	ABCD1234		1.0.0	1.0.0	1.0.0
Database Identifiers	bioproject accession	GENEPIO:0001136	The INSDC accession number of the BioProject(s) to which the BioSample belongs.	Required if submission is linked to a BioProject. BioProject are an organizing tool that links together raw sequence data, assemblies, and their associated metadata. A valid BioProject accession has prefix PRIN, PRIL OF PRID, e.g., PRINA12345 and is created once at the beginning of a new sequencing project. Your laboratory can have one or many BioProjects.			1.0.0	1.0.0	1.0.0
Database Identifiers	biosample accession	GENEPIO:0001139	The identifier assigned to a BioSample in INSDC archives.	Store the accession returned from the BioSample submission. NCBI BioSamples will have the prefix SAMN, while ENA BioSamples will have the prefix SAMEA.	SAMN14180202		1.0.0	1.0.0	1.0.0
Database identifiers	INSDC sequence read accession	GENEPIO:0101203	The identifier assigned to a sequence in one of the International Nucleotide Sequence Database Collaboration (INSDC) repositories.	Store the accession assigned to the submitted sequence. European Nucleotide Archive (ENA) sequence accessions start with ERR, NCBI-SRA accessions start with SRR, DNA Data Bank of Japan (DDBJ) accessions start with DRR and Genome Sequence Archive (GSA) accessions start with CRR.	SRR123456, ERR123456, DRR123456, CRR123456		3.0.0	1.0.0	1.0.0
Database identifiers	INSDC assembly accession	GENEPIO:0101204	The versioned identifier assigned to an assembly or consensus sequence in one of the International Nucleotide Sequence Database Collaboration (INSDC) repositories.	Store the versioned accession assigned to the submitted sequence e.g. the GenBank accession version.	LZ986655.1		3.0.0	1.0.0	1.0.0
5	ara un	05115010 0004447	T. 00010		EBI 181 400400				
Database Identifiers	GISAID accession	GENEPIO:0001147	The GISAID accession number assigned to the sequence.	Store the accession returned from the GISAID submission.	EPI_ISL_436489		1.0.0	1.0.0	1.0.0
	Sample collection and processing	GENEPIO:0001150		The name of the sample collector should be written out in full, (with minor exceptions) and be consistent across multiple submissions e.g. Public Health Agency of Canada. Public Health Ontario, BC Centre for Disease Control. The sample collector specified is at the discretion of the data provider (i.e. may be hospital, provincial public health lab,			400	400	100
Sample collection and processing	sample collected by	GENEPIO:0001153	The name of the agency that collected the original sample. The email address of the contact responsible for follow-up	or other). The email address can represent a specific individual or lab	BC Centre for Disease Control		1.0.0	1.0.0	1.0.0
Sample collection and processing	sample collector contact email	GENEPIO:0001156	regarding the sample.	e.g. johnnyblogs@lab.ca, or RespLab@lab.ca The mailing address should be in the format: Street numbe	RespLab@lab.ca		1.0.0	1.0.0	1.0.0
Sample collection and processing	sample collector contact address	GENEPIO:0001158	The mailing address of the agency submitting the sample.	and name, City, Province/Territory, Postal Code, Country			1.0.0	1.0.0	1.0.0
Sample collection and processing	sample collection date	GENEPIO:0001174	The date on which the sample was collected.	Sample collection date is critical for surveillance and many types of analyses. Required graunularity includes year, month and day. If this date is considered identifiable information, it is acceptable to add "litter" by adding or subtracting a calendar day (acceptable by GISAID). Alternatively, "received date" may be used as a substitute. The date should be provided in ISO 8601 standard format "YYYYYMM-DISA".	2020-03-1	6	1.0.0	1.0.0	1.0.0
				Provide the precision of granularity to the "day", "month", or "year" for the date provided in the "sample collection date" field. The "sample collection date" will be truncated to the precision specified upon export; "day" for "YYYY-MM-DD",					
Sample collection and processing	sample collection date precision	GENEPIO:0001177	The precision to which the "sample collection date" was provided.		year 2020-03-2	0	1.0.0	1.0.0	1.0.0
Sample collection and processing	sample received date	GENEPIO:0001179	The date on which the sample was received.	ISO 8601 standard "YYYY-MM-DD". Provide the country name from the controlled vocabulary		U		1.0.0	1.0.0
Sample collection and processing	geo_loc_name (country)	GENEPIO:0001181	The country where the sample was collected.	provided. Provide the province/territory name from the controlled	Canada		1.0.0	1.0.0	1.0.0
Sample collection and processing	geo_loc_name (state/province/territory)	GENEPIO:0001185	The state/province/territory where the sample was collected.	vocabulary provided. Use "Mpox virus". This value is provided in the template.	Saskatchewan		1.0.0	1.0.0	1.0.0
Sample collection and processing	organism	GENEPIO:0001191	Taxonomic name of the organism.	Note: the Mpox virus was formerly referred to as the "Monkeypox virus" but the international nomenclature has changed (2022).	Mpox virus		1.0.0	1.0.0	1.0.0
Sample collection and processing	isolate	GENEPIO:0001195	Identifier of the specific isolate.	Provide the GISAID EpiPox virus name, which should be written in the format "hMpxV/Canada/2 digit provincial ISO code-xxxxx/year". If the province code cannot be shared fo privacy reasons, put "UN" for "Unknown".			1.0.0	1.0.0	1.0.0
Sample collection and processing	purpose of sampling	GENEPIO:0001198	The reason that the sample was collected.	As all samples are taken for diagnostic purposes, "Diagnostic Testing" should be chosen from the picklist at this time. The reason why a sample was originally collected may differ from the reason why it was selected for sequencing, which should be indicated in the "purpose of sequencing" field.			1.0.0	1.0.0	1.0.0
